Agenda

1. **Introduction – The Global Value Fund**
2. **What are markets pricing in? What are the second page stories?**
3. **Protecting shareholder capital**
4. **Case studies**
5. **Appendices**

1. Introduction - The Global Value Fund (ASX: GVF)

The Global Value Fund

Our core discount capture strategy targets returns comparable with global equity markets while aiming for a significantly lower risk profile

A focus on listed securities which are undervalued relative to a defined and observable asset value

- A discount to “break-up” value

Closed-end funds (CEFs) will form the core of our investment universe

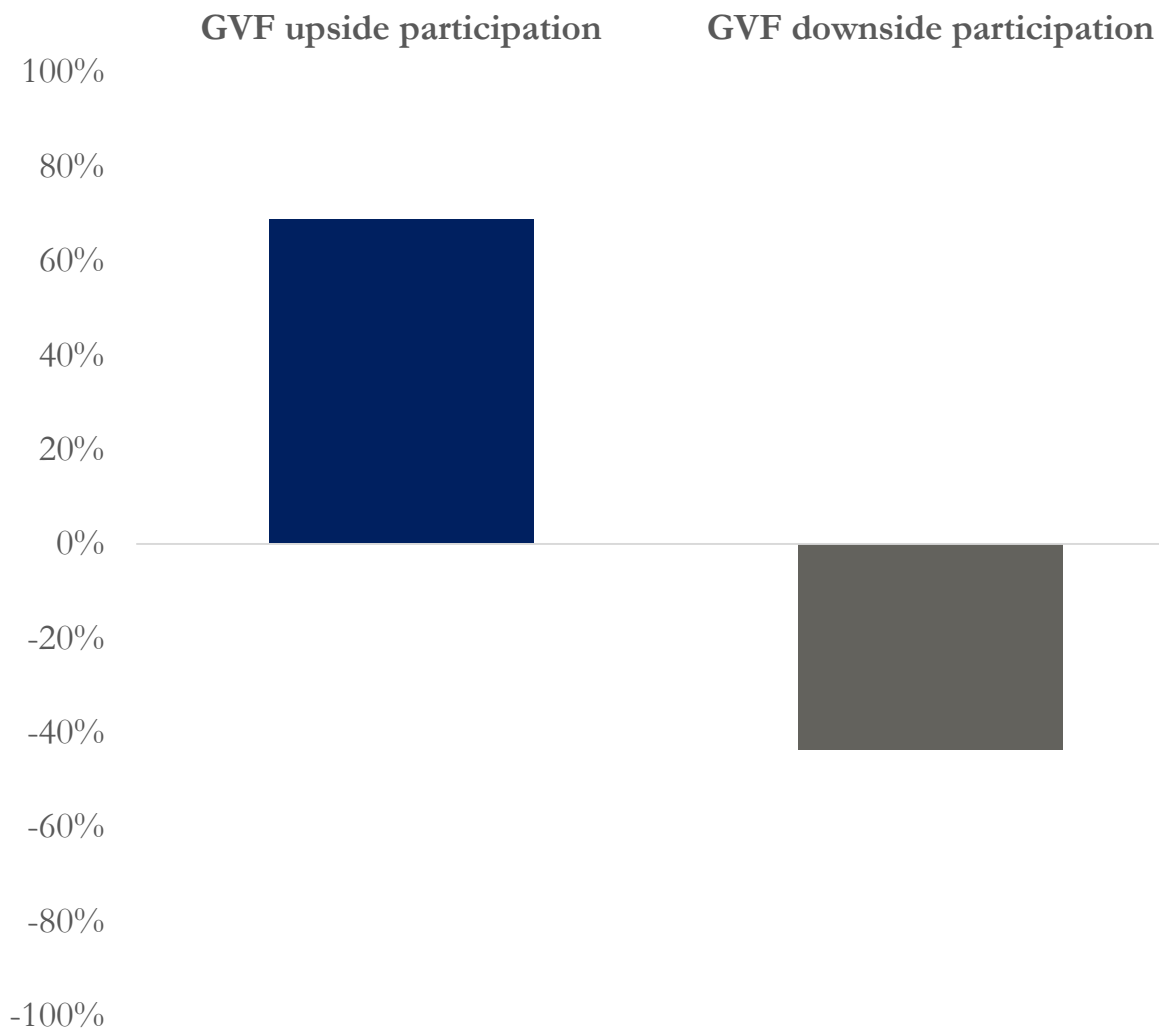

- Internationally, CEFs are a mainstream asset class, with an investable universe of >US\$400Bn

A variety of passive and active techniques are used to unlock value for our investors

We operate on a global stage; investing around the world and across asset classes

A focus on capital preservation

Global share markets upside vs. downside participation¹

Since IPO we have participated in 69%¹ of the upside in global share markets, but only 44%¹ of market declines.

¹ Global share markets refers to the MSCI All Country World Index in A\$ terms. Data source: Bloomberg LP and Staude Capital as of 30th September 2018.

Please note that past performance is not indicative of future returns

Please note that past performance is not indicative of future returns

Gross investment returns¹ since IPO

Attributed by market², currency³ and excess returns⁴

- 1 Gross investment returns refers to the total GVF investment return before taxes paid, expenses, management fees, dividends paid and the impact of dilution from exercised company options. Data sourced from Staude Capital.
 - 2 Gross returns attributable to the market exposures of the underlying assets held by the fund.
 - 3 Gross returns attributable to the currency exposures of the underlying assets held by the fund.
 - 4 Excess return represents the returns in excess of currency and market returns, attributable to the manager's investment strategy.
- As at 30th September 2018.

Please note that past performance is not indicative of future returns

4. Case studies

Case Study: London Listed Fund “A”

Trading opportunity: liquidity provision

Description

A closed-end fund listed on the London stock exchange that invests into UK listed companies.

It has >100 underlying holdings and is well diversified across a range of sectors, with the largest holding accounting for <5% of NAV.

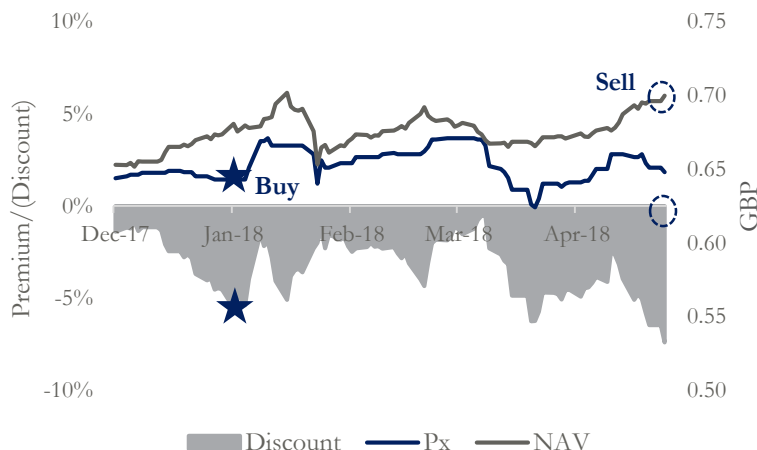

Investment Rationale

GVF secured a large block of stock at a c.5% discount to NAV in January 2018.

In order to keep the share price trading close to the NAV, the Fund offers an annual redemption facility.

Given the healthy diversification, reasonable fees and good performance of the underlying portfolio, GVF was happy holding this position until the discount contracted naturally or until the redemption facility was triggered.

London Listed Fund “A”: Discount History

Result

GVF redeemed its entire holding at NAV within a few months.

Over a very short holding period, GVF generated a 6.5% total return, capturing both the full 5% of discount as well as benefiting from the returns of the underlying portfolio, which outperformed the market over our holding period.

¹ Data source: Bloomberg LP and Staude Capital. Please note that past performance is not indicative of future returns.

Case Study: DW Catalyst Fund

Corporate action: unlocking low risk value

Description

DW Catalyst Fund (DWCG) was a closed-end fund listed on the London stock exchange.

It was a feeder fund which invested all of its assets into a master credit hedge fund run by DW Partners.

DWCG was one of a shrinking universe of London listed hedge funds unable to control the share price discount to NAV.

Investment Rationale

GVF first invested at the end of 2016 at 13.7% discount to NAV.

We invested with confidence that the NAV had a low risk profile and that a pending discount trigger mechanism could not be avoided.

This mechanism would be triggered if the share price discount to NAV was wider than 5%. This trigger would result in an optional 100% redemption at NAV less costs.

DWCG: Discount History

Result

Following the trigger, 58% of shareholders voted for redemption and after consultation with the Board, the Fund was put into voluntary wind down.

Prior to the Fund delisting in August 2017, GVF added to the position at a 7% discount to NAV. The position became 9.5% of the GVF NAV in November 2017, representing a high conviction holding.

Over our holding period the Fund has generated a 3.3% NAV return. GVF has however realised a 13.9% total return, unlocking considerable value on top of the underlying Fund's performance.

c.95% of the original NAV has been returned at NAV with the balance being held back until March 2019 for audit purposes.

¹ Data source: Bloomberg LP and Staude Capital. Please note that past performance is not indicative of future returns.

Case Study: Blue Capital Alternative Income

Corporate Activism: last line of defence

Description

Blue Capital Alternative Income Fund (BCAI): Invests into a master fund that owns a diversified portfolio of fully collateralised reinsurance-linked contracts, whose value is based on insured catastrophe event risks.

The risk/return profile of catastrophe risk is largely uncorrelated with traditional asset classes.

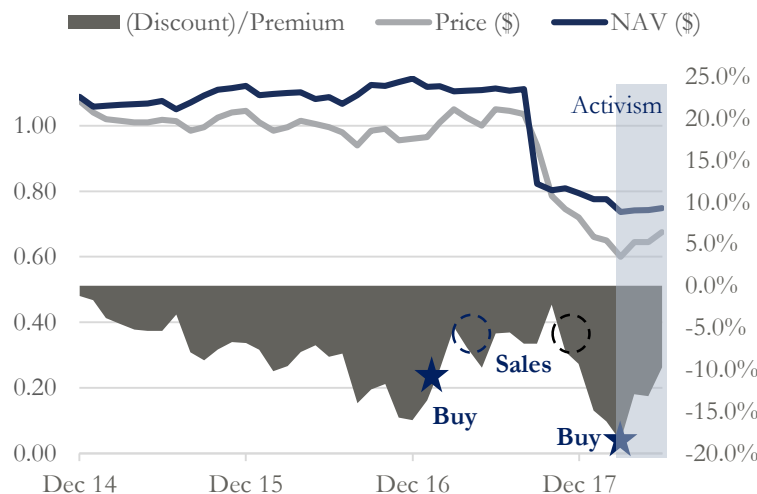

Investment Rationale

GVF invested into the fund in March 2017 at an 11% discount to NAV.

Discount control mechanism was triggered in August 2017 as the average discount was wider than 5%. Sales were made into the news of this announcement.

In September 2017, the US was hit by a series of unusually destructive hurricanes impacting the NAV. The Board backtracked on previous discount control commitments citing market conditions.

BCAI: Discount history

Engagement

GVF began buying again at a 22% discount in March 2018.

In April 2018, Staude Capital engaged with other shareholders and in May 2018 [wrote an open letter to the BCAI Board](#) ahead of a continuation vote of the Fund.

Despite the fact that the continuation vote failed to get shareholder support, the fund delisted and was put into liquidation in July 2018. GVF expects to receive NAV less the costs of liquidation over the next 12 months.

Following a >30% decline in the NAV over the holding period, GVF expects to make a return of +3.9%, an implied IRR +3.5%.

As at 31st July 2018

Biographies

Miles Staude – Portfolio Manager & Director

Miles has over seventeen years of experience in trading, investment management and research, covering a wide range of financial markets. He is the Portfolio Manager of the Global Value Fund and serves as a Director on the Global Value Fund Board. Under Mirabella's regulatory license, Miles has overall responsibility for the GVF portfolio management team's trading and investment management activities.

Prior to founding Staude Capital, Miles spent ten years as a Portfolio Manager and Investment Analyst at Metage Capital, a London based investment management firm. Before joining Metage he spent five years as a sell-side equity analyst at RBC Capital Markets, based in both Sydney and London. Miles holds an Economics degree from the University of Sydney and is a CFA Charterholder.

Emma Davidson – Investor Relations & Director

Emma is an accomplished global investment advisor with over eighteen years of experience. She spent twelve years working in senior roles at a number of London investment banks, most recently as the UK head of cross asset sales at Citigroup. In 2011, she founded her own investment advisory boutique, Affinity Capital, which serves a range of global clients, and where she continues to serve as Chairman. Emma is responsible for the management and investor relations of Staude Capital and serves on the Staude Capital Board.

Emma was awarded the 2016 Enterprising Women of the Year Award, an annual tribute to the world's top female entrepreneurs. She has also been recognized as one of the Inspirational Women 2016: City innovators, awarded by Brummell magazine.

Biographies

Rob Fairbairn – Investment Manager

Under Mirabella's regulatory license, Robert is a member of the GVF portfolio management team. Prior to joining Staude Capital, he performed a variety of roles over a period of eight years at Metage Capital, including trading, research analysis and portfolio management.

Before Metage, Robert worked at Endeavour Capital Management, a hedge fund originating from the fixed income arbitrage department of Salomon Brothers. Robert holds a Master's degree in Structural Engineering from the University of Birmingham and is a CFA Charterholder.

James Dow – Investment Manager

Under Mirabella's regulatory license, James is a member of the GVF portfolio management team. James has over twenty years of experience in financial markets, having managed a diverse range of financial instruments in his career.

Prior to working at Staude Capital, James spent sixteen years as an Investment Manager at Metage Capital, a London based investment management firm. Before joining Metage he spent two years as an Investment Manager at Credit Suisse and four years working in various investment support roles at Buchanan Partners, a London based hedge fund manager. James is a CFA Charterholder.

Emma Beall – Middle Office and support

Emma has more than fifteen years' experience in office management and administration roles. She has successfully completed both a degree in Mathematics/Sociology from the University of Bristol and a Business and Secretarial Diploma from Lucie Clayton, a renowned finishing school in London. Since starting her career as a PA at Morgan Stanley, Emma has provided essential office management support for businesses across various sectors, including banking, housing and healthcare.
